6 CORE BODY OF KNOWLEDGE Higher education faculty will want to use the Core Body of Knowledge to inform coursework, including fieldwork and evaluation of student competence. Courses that have already been developed should be aligned to the Core Competency Areas.

First Edition Designated a Doody's Core Title and Winner of an AJN Book of the Year Award! This distinguished title, written by nationally recognized nursing experts in health care and pediatrics, delivers the most current evidence-based practice standards and their application. These guidelines, developed through systematic consensus-building led by the AAN's Child, Adolescent, and Family Expert Panel, incorporates the wisdom of 17 professional nursing and healthcare organizations regarding the core elements of pediatric nursing excellence. This second edition contains substantial updates to all guidelines based on the most current research evidence and demonstrates examples of how to best apply the guidelines to nursing practice. Disseminating the gold standard of care for infants, children, adolescents, and families, this text addresses access to health care, genetic assessment and counseling, culturally responsive care, care for children and youth with disabilities, and others.

## Online Library 2013 Inpatient Core Competency Guide

Every chapter breaks down a guideline into its definition, history, and implications for clinical, education, policy, and research in nursing practice. A case study based around the analyzed guideline illustrates how the guideline should be employed in nursing practice culminates every chapter. Replete with supplemental online files full of resources to apply these guidelines to nursing practice, Guidelines for Nursing Excellence in the Care of Children, Youth, and Families represents an invaluable resource for pediatric nurses, nursing students, nursing educators, nursing administrators, pediatric and family nurse practitioners, advanced practice nurses, nursing clinicians in public health, school nurses, and nurse researchers. New to the Second Edition: Significant updates to all 17 guidelines based on latest research evidence Contributions by five new nursing and health care organizations A new chapter organizational framework incorporating useful pedagogical elements Examples of applications to education, research, policy, and clinical practice A new faculty toolkit Key Features: Provides current pediatric practice standards formatted and endorsed by 17 leading professional nursing and health care organizations Includes content applicable to advanced practice nurses, educators, researchers, and consultants Includes learning objectives, description of guidelines, applications to practice, exemplars, references, and websites for

The goals of Integrated Care: Working at the Interface of Primary Care and Behavioral Health are to educate psychiatrists about the fundamental shift underway in health care and to prepare them to be successful and effective in the new health care arena. The passage and implementation of the Patient Protection and Affordable Care Act presents an opportunity for newly insured patients and for funding models of integrated care, enabling psychiatrists to have a more significant population-level impact. The only book of its kind, the guide defines integrated care, reviews the evidence base, and addresses the three potential benefits of this model of care: improved outcomes, cost containment, and enhanced patient experience (also known as the "triple aim"). The new models of integrated care presented in this book are population-based, which is the key to improved outcomes, and they represent a change in how medicine in general and psychiatry in particular will approach health care delivery moving forward. The book's features are both high-impact and user-friendly: The book is divided into two sections, "Behavioral Health in Primary Care Settings" and "Primary Care in Behavioral Health Care Settings," with Section 1 focused on improving the detection and treatment of behavioral health conditions by

## Online Library 2013 Inpatient Core Competency Guide

integrating behavioral health services into primary care settings and Section 2 focused on improving the health status of patient populations with serious mental illness by integrating primary care into behavioral health treatment. Each chapter presents a set of "core principles of effective collaborative care," which serve as a guide for the structure and provision of care for the varying models, regardless of the setting. Contributors provide dozens of examples that highlight the impact psychiatrists can make in achieving the triple aim of improved outcomes, cost containment, and enhanced experience. Detailed case vignettes integrated throughout the book bring concepts to life and help clinicians to understand and improve the patient-provider relationship. The information presented in these chapters allows both practicing psychiatrists and those in training to develop a skill set essential to designing, working in, teaching, or promoting an integrated care program within a health care system. Evidence based and timely, *Integrated Care: Working at the Interface of Primary Care and Behavioral Health* is a must read for clinicians in the brave new world of health care reform.

The Oxford Textbook of Inpatient Psychiatry offers a comprehensive

and pragmatic guide to the UK's inpatient mental health care system.

The World Health Organization has developed these Nurse Educator Core Competencies to enable educators to effectively contribute to the attainment of high quality education, and the production of effective, efficient and skilled nurses who are able to respond to the health needs of the populations they serve. This will enable the attainment of objectives one and two of the Global strategy on human resources for health: Workforce 2030 and is also a priority in the updated Global strategic directions on nursing and midwifery 2016-2020. The aim of this publication is to provide a clear outline of Nurse Educator Core Competencies and performance expectations, which can form the basis for developing a competence-based curriculum encompassing the cognitive, affective and psychomotor skills and behaviors expected of nurse teachers. The competencies are intended to help guide the educational preparation of nurse teachers; ensure educational quality and accountability; and, ultimately, contribute to improving the provision of nursing care and outcomes of health services. Much effort has gone into the preparation of the Nurse Educator Core Competencies. It is the aim of the World Health Organization that they will facilitate nurse educators to attain increased proficiency in assisting student nurses to acquire all the

knowledge, skills and attitudes necessary to practice nursing effectively in the 21st century.

This revision of a well-loved text continues to embrace the confluence of person, environment, and occupation in mental health as its organizing theoretical model, emphasizing the lived experience of mental illness and recovery. Rely on this groundbreaking text to guide you through an evidence-based approach to helping clients with mental health disorders on their recovery journey by participating in meaningful occupations. Understand the recovery process for all areas of their lives—physical, emotional, spiritual, and mental—and know how to manage co-occurring conditions.

From the experts at the American Association of Critical-Care Nurses (AACN) comes the definitive resource for critical care certification and clinical practice. This new seventh edition has been thoroughly updated to reflect the current state of high acuity, progressive, and critical care nursing practice and includes expanded coverage of pain management, palliative care, and end-of-life care; transplantation; and key AACN initiatives. It also reflects the most current literature, national and international guidelines, clinical studies, and of course, the newest content on the CCRN® exam. Authored by the

## Online Library 2013 Inpatient Core Competency Guide

experts at the American Association of Critical-Care Nurses (AACN), this is the definitive guide to critical care nursing certification and clinical practice. NEW! Significantly updated content corresponds to the most recent CCRN® examination blueprint and reflects the most current literature, national and international guidelines, clinical studies, AACN/ANA scope of practice, and ECCO 3.0. NEW! Expanded coverage of key content reflects the healthcare needs of today's patients, including pain management, palliative care, and end-of-life care; nutritional support; transplantation; and key AACN initiatives. Concise outline format is organized by body system to make information easy to digest. NEW! Clinical Pearls and Key Concepts boxes highlight key content and serve as a convenient quick reference. NEW! Improved navigation includes printed index tabs to help distinguish chapters and find information fast. Basic to advanced levels of coverage, with an emphasis on clinical nursing practice, prepare you for the full range of knowledge you will encounter on the CCRN exam and in practice. Coverage of the AACN Synergy Model is featured in the new opening chapter. Professional Care and Ethical Practice is integrated into the Core Curriculum series framework. A new chapter on Critical Care Patients with Special Needs includes bariatric and geriatric patients in critical care, as well as high-risk obstetric patients. Features new content

on chest tubes, liver transplantation for acute liver failure, spirituality, and spiritual aspects of care. Integrates pain as the 5th vital sign and includes JCAHO, HCFA, and AHCPH guidelines relating to pain management. Features AHRQ evidence-based practice guidelines as reference sources for practice interventions. New organization for Patient Care presents patient problems, needs, etc. in order of clinical priority. Expanded Nursing Interventions includes considerations related to patient/family education, patient transfer, and discharge planning. Web-based resources for CDC, AHA, NINR, National Guideline Clearinghouse, NIH Consensus Conference Proceedings, ADA.

This is a major revision, updating, and expansion of the leading single-source volume on pediatric sedation outside of the operating room. Edited and written by an international roster of outstanding experts, it is the only book aimed at the broad range of specialists who deliver pediatric sedation in the non-OR setting. The Second Edition features a significant expansion of contributions from international leaders and individual new chapters on pre-sedation assessment; sedatives' short- and long-term effects on neurocognition; non-pharmacologic distractions; Michael Jackson's death and medical ethics; the role of simulation in safety and

## Online Library 2013 Inpatient Core Competency Guide

training; and palliative sedation in terminally ill children. The specialty-specific chapters continue to be geared toward all sedation providers, regardless of where they practice and patient safety is again emphasized. Fundamental chapters provide in-depth reviews of topics which include, among others, physiology and pharmacology. The book presents the latest guidelines across the specialties, both in the United States and abroad and noteworthy, ongoing research endeavors. From reviews of the First Edition: "This meritorious volume is a splendid collection of materials from highly experienced authors...I will make extensive use of this reference as the academic medical center in which I work continues to build sedation practices and assess credentialing/privileging aspects for professionals of all fields." –Joseph R. Tobin, MD in Journal of the American Medical Association. "Brings together sedation practice from a broad range of specialties into one well-written pediatric text...I will certainly be using this book as a reference text in the future." – Pediatric Anesthesia. "The first [text] directed at all specialists that treat children who require some sedation...also recognizes the contributions to pediatric sedation of many international societies and governmental organizations...It should be on the shelves of all office-based practices." –Journal of Neurosurgical Anesthesiology. "With the ever-increasing opportunities to perform various

## Online Library 2013 Inpatient Core Competency Guide

investigations and therapeutic procedures, combined with increasing demands and expectations from children and their parents, the need and demand for safe and effective sedation of paediatric patients outside the operating room is increasing. Against this background, the second edition of 'Paediatric Sedation Outside the Operating Room' is a very timely addition to the anaesthesia literature."—British Journal of Anesthesia

Hospital Neurology, An Issue of Neurologic Clinics, E-Book

This book will help all health professionals involved in the rehabilitation of older people to provide their patients with the highest possible quality of life and autonomy. Expanded and rewritten by a diverse team of authors, the text is suitable for doctors in all specialties that see older patients, as well as nurses, physiotherapists, occupational therapists, psychologists, dietitians, speech and language therapists/pathologists, physician associates/assistants, healthcare assistants, and many others including patients, family members and students. The book is written in an accessible, no-jargon style and provides a patient-centred perspective on recent advances in the field of rehabilitation – an increasingly important aspect of care for older people. Clear

## Online Library 2013 Inpatient Core Competency Guide

explanations of relevant concepts: ageing, frailty, comprehensive assessment, rehabilitation Broad coverage of all aspects of rehabilitation including different settings Explanations of input from multiple health professionals Problem-based section that highlights solutions to common issues during rehabilitation Specialty-specific areas of rehabilitation such as stroke rehabilitation, cancer rehabilitation, post-operative rehabilitation, trauma, rehabilitation in the community Practical section explaining how to plan discharge safely, run a care planning meeting, organize home supports, continue rehabilitation at home Evidence-based but accessible writing, complemented by practical clinical wisdom Aimed at a broader audience – applicable to all health professionals who see older patients Resources for patients and their caregivers Multiple-choice questions to test knowledge
