I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

A history of the English language traces its evolution from a Germanic dialect around 500 A.D. to its modern form, noting the influence of such groups and individuals as early Anglo-Saxon tribes, Alfred the Great, and William Shakespeare.

The Encyclopedia of Nineteenth-Century Photography is the first comprehensive encyclopedia of world photography up to the beginning of the twentieth century. It sets out to be the standard, definitive reference work on the subject for years to come. Its coverage is global - an important 'first' in that authorities from all over the

world have contributed their expertise and scholarship towards making this a truly comprehensive publication. The Encyclopedia presents new and ground-breaking research alongside accounts of the major established figures in the nineteenth century arena. Coverage includes all the key people, processes, equipment, movements, styles, debates and groupings which helped photography develop from being 'a solution in search of a problem' when first invented, to the essential communication tool, creative medium, and recorder of everyday life which it had become by the dawn of the twentieth century. The sheer breadth of coverage in the 1200 essays makes the Encyclopedia of Nineteenth-Century Photography an essential reference source for academics, students, researchers and libraries worldwide.

This book investigates the nature of aesthetic experience and aesthetic objects. Written by leading philosophers, psychologists, literary scholars and semioticians, the book addresses two intertwined issues. The first is related to the phenomenology of aesthetic experience: The understanding of how human beings respond to artworks, how we process linguistic or visual information, and what properties in artworks trigger aesthetic experiences. The examination of the properties of aesthetic experience reveals essential aspects of our perceptual, cognitive, and semiotic capacities. The second issue

studied in this volume is related to the ontology of the work of art: Written or visual artworks are a specific type of objects, containing particular kinds of representation which elicit a particular kind of experience. The research question explored is: What properties in artful objects trigger this type of experience, and what characterizes representation in written and visual artworks? The volume sets the scene for state-of-the-art inquiries in the intersection between the psychology and ontology of art. The investigations of the relation between the properties of artworks and the characteristics of aesthetic experience increase our insight into what art is. In addition, they shed light on essential properties of human meaning-making in general.
