6.0001 Introduction to Computer Science and Programming in Python is intended for students with little or no programming experience. It aims to provide students with an understanding of the role computation can play in solving problems and to help students, regardless of their major, feel justifiably confident of their ability to write small programs that allow them to accomplish useful goals.

Introduction to Computer Science and Programming in Python |

Course description This course is an introduction to computer science for students without prior programming experience. We explore problem-solving methods and algorithm development using the high-level programming languages Python and Scratch. Python is a language with a simple syntax, and a powerful set of libraries.

Introduction to Computer Science with Python | Harvard |

Even if you previously took the course with Python 2.7, you will be able to easily transition to Python 3.5 in future courses, or enroll now to refresh your learning. Since these courses may be the only formal computer science courses many of the students take, we have chosen to focus on breadth rather than depth.

Introduction to Computer Science and Programming Using Python

This Computer science and programming using python course will introduce you to the fundamental ideas in computing and teach you to read and write your own computer programs. Computer science is about how to solve problems, like building a search engine, by breaking them into smaller pieces and then precisely and mechanically describing a sequence of steps that you can use to solve each piece.
