Given the importance of new emerging markets in the Far East, Middle East, Asia and Latin America, this book raises important questions about the applicability of existing marketing theory and practice, which was originally developed using the model of Western society. An extensive range of cross-cultural marketing issues is addressed, including: Cross-cultural consumer behaviour Cross-

Tietz's classic handbook presents information on common tests as well as rare and highly specialized tests and procedures - including a summary of the utility and merit of each test.

Biological variables that may affect test results are discussed, and a focus is placed on reference ranges, diagnostic information, clinical interpretation of laboratory data, interferences, and specimen types. New and updated content has been added in all areas, with over 100 new tests added. Tests are divided into 8 main sections and arranged alphabetically. Each test includes necessary

It describes the unique anatomy and physiology of the lymphatic system and the intimate relationship it shares with the venous system. It explores the differential diagnosis of the "swollen leg/arm", which is often the presenting problem to the health care professional. The necessity of history taking, physical examination and laboratory studies are noted. Treatment methods are described as an introduction and psychosocial and quality of life issues are explored in depth.
