Cyborgs and Citadels - Cyborg Anthropology

"In Cyborgs & Citadels, some of this country's thinkers explore such questions as how science gains authority to direct truth practices (the "Citadel" problem), the boundaries between humans and machines, and how science, technology, and medicine contribute to the fashioning of everyday lives and selves (the "Cyborg" problem). Their Fieldwork sites include a prenatal sonogram clinic, an inner ...

Cyborgs and Citadels: Anthropological Interventions in ...

Cyborgs and Citadels. Some of the country's most influential thinkers use anthropological methods and theories to examine the practices and practitioners of contemporary science, technology, and medicine in the United States. The authors explore such questions as how science gains authority to direct truth practices, the boundaries between humans and machines, and how science, technology, and medicine contribute to the fashioning of selves.

History. Cyborg anthropology is a recent subspecialty launched at the Annual Meetings of the American Anthropological Association (AAA) in 1993. Within the AAA cyborg anthropology is associated with the Committee for the Anthropology of Science, Technology and Computing (CASTAC). From the start cyborg anthropologists have located themselves within the larger transdisciplinary field of Science and Technology Studies (STS), attending with frequency the annual meetings of the Society for the ...
