Technology Security Professionals have spent a tremendous amount of time, money and resources to deploy a Defense in Depth approach to Information Technology Security. Yet successful attacks against RSA, HB Gary, Booz, Allen & Hamilton, the United States Military, and many others are examples of how Defense in Depth, as practiced, is unsustainable and the examples show that the enemy cannot be eliminated permanently.

managerial cost make defense-in-depth impractical to fully implement (Small 2011), because massive unnecessary efforts might be wasted on irrelevant attack vectors and security activities. With limited resources, system wide defense-in-depth provides only a wide but low-level defense across the network, which might be able to stop sophisticated attackers.
