First published in 1956, *The Power Elite* stands as a contemporary classic of social science and social criticism. C. Wright Mills examines and critiques the organization of power in the United States, calling attention to three firmly interlocked prongs of power: the military, corporate, and political elite. *The Power Elite* can be read as a good account of what was taking place in America at the time it was written, but its underlying question of whether America is as democratic in practice as it is in theory continues to matter very much today. What *The Power Elite* informed readers of in 1956 was how much the organization of power in America had changed during their lifetimes, and Alan Wolfe's astute afterword to this new edition brings us up to date, illustrating how much more has changed since then. Wolfe sorts out what is helpful in Mills' book and which of his predictions have not come to bear, laying out the radical changes in American capitalism, from intense global competition and the collapse of communism to rapid technological transformations and ever changing consumer tastes. *The Power Elite* has stimulated generations of readers to think about the kind of society they have and the kind of society they might want, and deserves to be read by every new generation.

"Behind every awful, dangerous decision lurks one evil beast: the Cool. From politics to the personal, from fashion to food, from the campus to the locker room, the desire to be cool has infected all aspects of our lives. At its most harmless, it is annoying. At its worst, it is deadly, on a massive scale. The Cool are the termites of life, infiltrating every nook and cranny and destroying it from within. The Cool report the news, write the scripts, teach our children, run our government--and each day they pass judgment on those who don't worship their coolness. The cool fawn over terrorists, mock the military, and denigrate employers. They are, in short, awful people. In *Not Cool*, Greg Gutfeld, host of *Red Eye* and cohost of *The Five*, and bestselling author of *The Joy Of Hate*, lays out the battle plan for reclaiming the real American ideal of cool (building businesses, protecting freedom at home and abroad, taking responsibility for your actions, and leaving other people alone to live as they damn well please). *Not Cool* fights back against the culture of phonies, elitists, and creeps who want your soul. It's not a book, it's a weapon--and one should be armed with it at all times"--

A storm is approaching Apex City, and unless Joy and her fellow Hunters put up the fight of their lives, it might just sweep them all away . . .

Every American city had a small, self-aware, and active black elite, who felt it was their duty to set the standard for the less fortunate members of their race and to lead their communities by example. Professor Gatewood's study examines this class of African Americans by looking at the genealogies and occupations of specific families and individuals throughout the United States and their roles in their various communities. --from publisher description.

Now a Netflix original series Discover the classic, behind-the-scenes chronicle of John E. Douglas ' twenty-five-year career in the FBI Investigative Support Unit, where he used psychological profiling to delve into the minds of the country ' s most notorious serial killers and criminals. In chilling detail, the legendary Mindhunter takes us behind the scenes of some of his most gruesome, fascinating, and challenging cases—and into the darkest recesses of our worst nightmares. During his twenty-five year career with the Investigative Support Unit, Special Agent John Douglas became a legendary figure in law enforcement, pursuing some of the most notorious and sadistic serial killers of our time: the man who hunted prostitutes for sport in the woods of Alaska, the Atlanta child murderer, and Seattle's Green River killer, the case that nearly cost Douglas his life. As the model for Jack Crawford in *The Silence of the Lambs*, Douglas has confronted, interviewed, and studied scores of serial killers and assassins, including Charles Manson, Ted Bundy, and Ed Gein, who dressed himself in his victims' peeled skin. Using his uncanny ability to become both predator and prey, Douglas examines each crime scene, reliving both the killer's and the victim's actions in his mind, creating their profiles, describing their habits, and predicting their next moves.
