Materials and Metallurgy Lecture

...

Metallurgical & Materials Engineering encompasses three inter-related engineering disciplines: mineral processing, extractive (or process) metallurgy, and materials science and engineering. While remaining true to its School of Mines heritage, the program curriculum features a strong core of fundamental engineering, process, and materials courses in addition to fulfilling Montana Tech ' s general education requirements.

Metallurgical and Materials
Engineering < Colorado School ...
Metallurgy is a sub-domain of materials science and engineering that studies the chemical behaviour of metallic elements, their inter-metallic compounds, and their mixtures, which are called alloys . Metallurgy encompasses both the science and the technology of metals. That is, the way in which science is applied to the production of metals, and the engineering of metal components used in products for both consumers and

Engineering

Materials science is a syncretic discipline hybridizing metallurgy, ceramics, solid-state physics, and chemistry. It is the first example of a new academic discipline emerging by fusion rather than fission. Many of the most pressing scientific problems humans currently face are due to the limits of available materials and how they are used.
