When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of

improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

and companies don't seem to care. And while anyone can learn the UX remedies---usability testing, personas, prototyping and so on---unless your organization "gets it," putting them into practice is trickier. Undercover User Experience is a pragmatic guide from the front lines, giving frank advice on making UX work in real companies with real problems. Readers will learn how to fit research, idea generation, prototyping and testing into their daily workflow, and how to design good user experiences under the all-too-common constraints of time, budget and culture. "A wonderful, practical, yet subversive book. Cennydd and James teach you the subtle art of fighting for---and then designing for---users in a hostile world."---Joshua Porter, co-founder Performable and co-creator of 52 weeksofUX.com

The mission of the National Institute of Standards and Technology (NIST) enables NIST to provide broad support for the advancement of U.S. manufacturing. Research and services supporting manufacturing are intended to be an important component in all of the NIST laboratories. Moreover, since manufacturing is a major part of the U.S.

economy, the growth or loss of U.S. manufacturing jobs is a very important issue. Clearly, the successful execution of NIST's programs supporting manufacturing will have a significant impact on manufacturing jobs in the United States. With the multidisciplinary, multisector, and crosscutting nature of manufacturing, the Director of NIST requested that the National Research Council (NRC) assess the manufacturing-related programs at NIST in 2012. Accordingly, a panel of experts was convened by the National Research Council to perform the assessment. The Panel on review of the Manufacturing-Related Programs at the national Institute of Standards and Technology visited the NIST campus in Gaithersburg, Maryland, on March 26-28, 2012. A Review of the Manufacturing-related

Programs at the National Institute of Standards and Technology: Fiscal Year 2012 contains the results of the panel's assessment. The assessment considered manufacturing research at NIST broadly, with emphasis on the specific advanced manufacturing areas: Nanomanufacturing (including Flexible Electronics); Smart Manufacturing (including Robotics); and Next-Generation Materials Measurements, Modeling, and Simulation. The area of Biomanufacturing also reviewed as a subset of the Nanomanufacturing review. As is to be expected for programs covering such wide scope, the boundaries among these broad areas are not rigid and there is some overlap among them. On the basis of its assessment, the panel formed the observations and recommendations which are

In her sixth novel, Cynthia Ozick retells the story of Henry James ' s *The Ambassadors* as a photographic negative, retaining the plot but reversing the meaning. *Foreign Bodies* transforms Henry James ' s prototype into a brilliant, utterly original, new American classic. At the core of the story is Bea Nightingale, a fiftyish divorced schoolteacher whose life has been on hold during the many years since her brief marriage. When her estranged, difficult brother asks her to leave New York for Paris to retrieve a nephew she barely knows, she becomes entangled in the lives of her brother ' s family and even, after so long, her ex-husband. Every one of them is irrevocably changed by the events of
