How did the concept of the avant-garde come into existence? How did it impact on the performing arts? How did the avant-garde challenge the artistic establishment and avoid the pull of commercial theatre, gallery and concert-hall circuits? How did performance artists respond to new technological developments? Placing key figures and performances in their historical, social and aesthetic context, Günter Berghaus offers an accessible introduction to post-war avant-garde performance. Written in a clear, engaging style, and supported by text boxes and illustrations throughout, this volume explains the complex ideas behind avant-garde art and evocatively brings to life the work of some of its most influential performance artists. Covering hot topics such as multi-media and body art performances, this text is essential reading for students of theatre studies and performance.

During the 1960s and 1970s in New York City, young artists exploited an industrial wasteland to create spacious studios where they lived and worked, redefining the Manhattan area just south of Houston Street. Its use fueled not by city planning schemes but by word-of-mouth recommendations, the area soon grew to become a world-class center for artistic creation—indeed, the largest urban artists’ colony ever in America, let alone the world. Richard Kostelanetz’s *Artists’ SoHo* not only examines why the artists came and how they accomplished what they did but also delves into the lives and works of some of the most creative personalities who lived there during that period, including Nam June Paik, Robert Wilson, Meredith Monk, Richard Foreman, Hannah Wilke, George Macquinn, and Alan Sauter. Gallerists followed the artists in fashioning themselves, their homes, their buildings, and even their streets into transiently prominent exhibition and performance spaces. *SoHo* pioneer Richard Kostelanetz’s extensively researched intimate history is framed within a personal memoir that unearths myriad perspectives: social and cultural history, the changing rules for residency and ownership, the ethos of the community, the physical layouts of the lofts, the types of art produced, venues that opened and closed, the daily rhythm, and the gradual invasion of “new people.” *Artists’ SoHo* also explores how and why this fertile bohemia couldn’t last forever. As wealthier people paid higher prices, galleries left, younger artists settled elsewhere, and the neighborhood became a “SoHo Mall” of trendy stores and restaurants. Compelling and often humorous, *Artists’ SoHo* provides an analysis of a remarkable neighborhood that transformed the art and culture of New York City over the past five decades.

In Paik’s *Virtual Archive*, Hanna B. Hölling contemplates the identity of multimedia artworks by reconsidering the role of conservation in our understanding of what the artwork is and how it functions within and beyond a specific historical moment. In Hölling’s discussion of works by Nam June Paik (1932–2006), the hugely influential Korean American artist who is considered the progenitor of video art, she explores the relation between the artworks’ concept and material, theories of musical performance and performativity, and the Bergsonian concept of duration, as well as the parts these elements play in the conceptualization of multimedia artworks. Hölling combines her astute assessment of artistic technologies with ideas from art theory, philosophy, and aesthetics to probe questions related to materials and materiality, not just in Paik’s work but in contemporary art in general. Ultimately, she proposes that the archive—the physical and virtual realm that encompasses all that is known about an artwork—is the foundation for the identity and continuity of every work of art.

The author shares his firsthand knowledge of Soho’s rise to prominence and eventual decline as the center of Manhattan’s art scene, recalling the confluence of economic and social factors that made the community come alive as a haven for artists, musicians, and creative
