This book seeks to explore how the UN has generated, warehoused, disseminated, structured, packaged, expanded, transferred and leveraged its vast resources of accumulated information and experience throughout the decades and, particularly, since the start of the 21st century with the introduction of more connective information and communications technology. It examines the overarching objectives that have guided such activity and divides UN knowledge management into three distinct, but often overlapping and intertwining, categories: knowledge for social and organizational learning; knowledge for norm setting; and knowledge for creation of products and services. Svenson brings together these multiple aspects of UN knowledge management to present a holistic view of how the organization utilizes its

global intelligence to educate, advocate and serve member countries' development. Instead of looking at the UN as an international bureaucracy or as a peacekeeping, policymaking, humanitarian or development entity, this work studies the UN as a generator and purveyor of information, learning and experience in all of these areas. This book will be key reading for all students and scholars of international organizations.

The prevalence of natural disasters in recent years has highlighted the importance of preparing adequately for disasters and dealing efficiently with their consequences. This book addresses how countries can enhance their resilience against natural disasters and move towards economic growth and sustainable development. Covering a wide range of issues, it shows how well thought-out measures can be applied to minimize the impacts of disasters in a variety of situations. Starting with the need for coping with a rapidly changing global environment, the book goes on to demonstrate ways to strengthen awareness of the effectiveness of preventive measures, including in the reconstruction phase. The book also covers the roles played by different actors as well as tools and technologies for improved disaster risk reduction. It focuses on a variety of case studies from across Asia, Africa and Latin America, drawing out lessons that can be applied internationally. This book will be of great interest to professionals in disaster management, including national governments, donors, communities/citizens, NGOs and private sector. It will also be a highly valuable resource for students and researchers in disaster management and policy, development studies and economics.

This Handbook provides comprehensive coverage of all of the major factors that underpin our understanding of urban and transport planning in the developed world. Combining urban and transport planning in one volume, the chapters present the state of the art as well as new research and directions for the future. The contributions from leading international academics at the forefront of their fields consider transport and urban planning from a number of different perspectives including historical, policy and strategy dimensions, appraisal and financing of options, planning and design of urban areas and the management of transport and urban systems. Examples and practical guides from the developed world are included along with a detailed discussion of the emerging issues. The Handbook provides an essential reference to all of the key points on the topic as well as signalling areas of concern and future research paths. Japan's Foreign Aid Policy in Africa seeks to evaluate TICAD's intellectual contribution to and its development practices regarding Africa over the past 20 years. A central conclusion is that, while TICAD bureaucrats lacked agency to support Japanese companies in Africa, the model of emerging powers partnerships has expanded in Africa.

Malaysia's natural resources and its well-educated population are some of the many credentials that keep the country in good stead, with priorities centred on preparing for the ASEAN Economic Community in 2015 and steering the policy framework toward more inclusive political representation. The economy is built around global trade, and the government is working to encourage greater private investment. Malaysia's GDP per capita is the highest in South-east Asia, with the exception of smaller countries like Singapore and Brunei Darussalam, \$ reaching 10,548 in 2013 based on a GDP of \$ 307.25bn and a population of almost 30m. The country produces 39% of the world's palm oil and 44% of its exports, and Increasing global demand for the commodity Bodes well for the industry. Malaysia has seen its stock rise in the World was Bank's Annual " the Ease of Doing Business" report, moving up to 6th position in 2014 from 8th the previous year. 's Avatar Recent times have seen the Government push hard for a Greater role for the : private sector in the country's development, with the various Government Programmes aiming to boost Transparency, accountability and Sustainable Growth. The overall aim of these plans is to elevate Malaysia to become a high -income country by 2020.

The World Development Report 2014 examines how improving risk management can lead to larger gains in development and poverty reduction. It argues that improving risk management is crucial to reduce the negative impacts of shocks and hazards, but also to enable people to pursue new opportunities for growth and prosperity.
