Elisha Cooper spent a year hanging out at a Chicago high school— listening and sketching students. He followed eight kids, mostly seniors, through their entire year, and by telling their specific stories he gives us a more general picture of what it's like to be a high school student. Part documentary, part sketchbook, this is a, thoroughly entertaining account.

Making education and career connections.

Enter the Alternative School is an in-depth examination of public school alternatives to traditional educational models in the US. This book analyses how urban education can respond to a system growing increasingly standardised and privatised. As an example, Central Park East Secondary School (CPSS), a public alternative schooling model, successfully served predominantly low-income and minority students. It also changed the New York City public school system while promoting methods that allowed educational institutions to make changes in the lives of their students. Written by a sociologist who was both a student at CPSS and a teacher at a school developed from the CPSS model, the book analyses education from a range of vantage points, assesses outcomes, and invites readers to consider the potential of alternative educational models to address the challenges of reforms that attempt to provide quality education to the low-income and minority students otherwise under served by public schools.

Rusty boats litter the ground. The smell of dead fish fills the air. Who would believe the Salton Riviera was once a popular vacation spot? Once host to thousands of beachgoers, the area now sits empty. This high-interest book will outline just what caused the community's decline. Special features such as maps, timelines, and fun facts add even more to this interesting title.
