175 Cd Adjustment

Basically, the Strom. 175 CD 2 was fitted to cope with the emissions regulations and was designed to be set-up at the factory and not tampered with by owners, so adjustment of the mixture is not possible.

However...there are ways of getting around this - 1) fit a different needle.

Adjustment
The Stromberg CD carburettor, like the SU (See Adjusting an SU carburettor), is a constant-depression carburettor, hence the CD. The two work in much the same way, but the Stromberg differs in having an air valve - commonly called the piston - surrounded by a rubber diaphragm in the dashpot.

Understanding the Zenith
Stromberg 175 CD2 carburetor
19 February 2009, 04:59. I
thought it might be useful
to gather together advice on
understanding the various
features, mainly lesser
known ones in the first
place, of the Zenith 175 CD2
carburetors and their
adjustment and possibly post
them to the Wiki page on the
Forum. I have one immediate
query as follows: On the arm

result in a mixture too lean or too rich for starting and cold running. To adjust, loosen the three screws that hold the heat mass, and rotate the heat mass counter clockwise to lean the mixture, and clockwise to richen it. Don't turn too much...a little goes a long way. If everything is working right, the ZS Choke

The Zenith Stromberg Water Choke

The key to getting a Stromberg to work smoothly is in knowing how to adjust the idle mixture screw PROPERLY. Lets set it up right... With the engine not running, remove the idle mixture screw from the carburetor. Remove the tension spring and washer. Then, start the mixture screw back into it's threaded hole. Turn it inward until it stops (do
