SUNFLO - Sundryne
Sunflo pumps are single stage that employ an integral gearbox. Designed to increase the pressure of a continuous flow of fluid by applying centrifugal action, Sunflo pumps are most commonly used in general industry applications. Commonly applied in power generation, reverse osmosis, and washdown services.

SUNFLO P-2000 PUMPS Instruction and Operation Manual
The Sunflo P-3000 pump is a high pressure/high speed centrifugal pump which provides multi-stage performance from a single-stage unit. The frame mounted configuration offers a greater degree of performance diversity and added driver flexibility such as the use of standard electric motors, steam turbines, and internal combustion.
