Whether you have a stubbed toe or a stubborn case of the blues, within these pages you'll find a cure in the form of a novel – or a combination of novels – to help ease your pain. You'll also find advice on how to tackle common reading ailments – such as what to do when you feel overwhelmed by the number of books in the world, or if you have a tendency to give up halfway through. When read at the right moment in your life, a novel can – quite literally – change it, and The Novel Cure is a reminder of that power. Written with authority, passion and wit, here is a fresh approach to finding new books to read, and an enchanting way to revisit the books on your shelves.

The stories that shape our children's lives are too important to be left to chance. With The Story Cure, bibliotherapists Ella Berthoud and Susan Elderkin have put together the perfect manual for grown-ups who want to initiate young readers into one of life's greatest pleasures. There's a remedy for every hiccup and heartache, whether it's between the covers of a picture book, a pop-up book, or a YA novel. You'll find old favourites like *The Borrowers* and *The Secret*

Garden alongside modern soon-to-be classics by Michael Morpurgo, Malorie Blackman and Frank Cottrell-Boyce, as well as helpful lists of the right reads to fuel any obsession - from dogs or dinosaurs, space or spies. Wise and witty, *The Story Cure* will help any small person you know through the trials and tribulations of growing up, and help you fill their bookshelves with adventure, insight and a lifetime of fun.

"The inspiring memoir of a young doctor and former college athlete who became a champion for people suffering from rare, under-researched diseases--all while battling his own. A former Georgetown quarterback nicknamed "The Beast," David Fajgenbaum was also a force in medical school, where he was known for his unmatched mental stamina. But things changed dramatically when he began suffering from inexplicable fatigue. In a matter of weeks, his organs were failing and he was read his last rites. Doctors were baffled over a condition they had yet to even diagnose; floating in and out of consciousness, Fajgenbaum prayed for the equivalent of game day overtime: a second chance.

Miraculously, Fajgenbaum survived, but only to endure repeated near-death relapses from what would eventually be identified as a form of Castleman disease--an extremely deadly and rare condition that acts like a cross between cancer and an autoimmune disease. When he relapsed on the only drug in development and realized that the medical community was unlikely to make progress in time to save his life, Fajgenbaum turned his desperate hope for a cure into concrete action: between hospitalizations he studied his own charts and tested his own blood samples, looking for clues that could unlock a new treatment. With the help of family, friends and mentors, he also reached out to other Castleman disease patients and physicians, and eventually came up with an ambitious plan to crowdsource the most promising research questions and recruit world-class researchers to tackle them; instead of waiting for the scientific stars to align, he proposed to align them himself. More

than five years later and now married to his college sweetheart, his hard work has paid off: a treatment that he identified has induced a tentative remission and his novel approach to collaborative scientific inquiry has become a blueprint for advancing rare disease research. His incredible story demonstrates the potency of hope, and what can happen when forces of determination, love, family, faith and serendipity collide"--

A novel is a story, a collection of experiences transmitted from the mind of one to the mind of another. It offers a way to unwind, a way to focus, a way to learn about life—distraction, entertainment, and diversion. But it can also be something much more powerful. When read at the right time in your life, a novel can—quite literally—change it. *The Novel Cure* is a reminder of that power. To create this apothecary, the authors have trawled through two thousand years of literature for the most brilliant minds and engrossing reads. Structured like a reference book, it allows readers to simply look up their ailment, whether it be agoraphobia, boredom, or midlife crisis, then they are given the name of a novel to read as the antidote.

A rigorous, skeptical, deeply reported look at the new science behind the mind's surprising ability to heal the body. Have you ever felt a surge of adrenaline after narrowly avoiding an accident? Salivated at the sight (or thought) of a sour lemon? Felt turned on just from hearing your partner's voice? If so, then you've experienced how dramatically the workings of your mind can affect your body. Yet while we accept that stress or anxiety can damage our health, the idea of "healing thoughts" was long ago hijacked by New Age gurus and spiritual healers. Recently, however, serious scientists from a range of fields have been uncovering evidence that our thoughts, emotions and beliefs can ease pain, heal wounds, fend off infection and heart disease and even slow the progression of AIDS and some cancers. In *Cure*, award-winning science writer Jo

Marchant travels the world to meet the physicians, patients and researchers on the cutting edge of this new world of medicine. We learn how meditation protects against depression and dementia, how social connections increase life expectancy and how patients who feel cared for recover from surgery faster. We meet Iraq war veterans who are using a virtual arctic world to treat their burns and children whose ADHD is kept under control with half the normal dose of medication. We watch as a transplant patient uses the smell of lavender to calm his hostile immune system and an Olympic runner shaves vital seconds off his time through mind-power alone. Drawing on the very latest research, Marchant explores the vast potential of the mind's ability to heal, lays out its limitations and explains how we can make use of the findings in our own lives. With clarity and compassion, Cure points the way towards a system of medicine that treats us not simply as bodies but as human beings. A New York Times Bestseller Finalist for the Royal Society Insight Investment Science Book Prize Longlisted for the Wellcome Book Prize

A collection of cures for writer's block, plotting and characterization issues, and other ailments writers face when completing a novel or memoir, prescribed by the director of creative writing at Ohio University. People want to write the book they know is inside of them, but they run into stumbling blocks that trouble everyone from beginners to seasoned writers. Drawing on his years of teaching at both the university level and at writing workshops across the country, Professor Dinty W. Moore dons his book-doctor hat to present an authoritative guide to curing the issues that truly plague writers at all levels. His hard-hitting handbook provides inspiring solutions for diagnoses such as character anemia, flat plot, and silent voice, and is peppered with flashes of Moore's signature wit and unique take on the writing life.

Everything Happens for a Reason (And Other Lies I've Loved) asks, how do you move forward with a life you didn't choose? "Kate Bowler is the only one we can trust to tell us the truth."—Glennon Doyle, author of the #1 New York Times bestseller *Untamed* It's hard to give up on the feeling that the life you really want is just out of reach. A beach body by summer. A trip to Disneyland around the corner. A promotion on the horizon. Everyone wants to believe that they are headed toward good, better, best. But what happens when the life you hoped for is put on hold indefinitely? Kate Bowler believed that life was a series of unlimited choices, until she discovered, at age 35, that her body was wracked with cancer. In *No Cure for Being Human*, she searches for a way forward as she mines the wisdom (and absurdity) of today's "best life now" advice industry, which insists on exhausting positivity and on trying to convince us that we can out-eat, out-learn, and out-perform our humanness. We are, she finds, as fragile as the day we were born. With dry wit and unflinching honesty, Kate Bowler grapples with her diagnosis, her ambition, and her faith as she tries to come to terms with her limitations in a culture that says anything is possible. She finds that we need one another if we're going to tell the truth: Life is beautiful and terrible, full of hope and despair and everything in between—and there's no cure for being human.
